Question	Your response
Question 1: Do you have any comments on Ofcom's proposals to make more frequencies available for restricted services?	Following our first SRSL in 1993, LHBS/Radio Broadgreen would very much welcome the proposal to make more FM frequencies available for low powered restricted services along with fewer restrictions on power/antenna height/polarity etc.
Question 2: Do you have any comments on Ofcom's proposed restricted service standard form Broadcasting Act licence?	
Question 3: Do you have any comments on Ofcom's proposal to issue existing extended duration SRSL licensees with a restricted service licence on a new frequency at the end of their existing licence term, should they apply for a new licence?	I think most SRSL applicants are already aware that a previous frequency may not be available for use again and should expect the possibility of frequency change.
Question 4: Do you have any comments on Ofcom's proposal to issue existing LRSL licensees with limited coverage frequencies (if available) at the end of their existing licence term, should they apply to renew their licence?	<i>Although the idea of clearing the 87mhz for short-term RSL's would make sense, there could be unwanted costs involved for existing services if they had to change frequency.</i>
Question 5: Do you have any comments on these changes to our application process, as set out in the revised guidance at Annex 4?	<i>We welcome the changes to the application restrictions in particular the use of FM frequencies outside the M25 boundary and that the licensee would be someone closely involved with the radio service.</i>
Question 6: Do you have any comments on Ofcom's proposal to invite the Secretary of State for DCMS to consider making an order which would provide an exception for certain	

services from the need to hold a Broadcasting Act licence?

Question 7: Do you have any comments on Ofcom's proposed fees for restricted services?
