

News Consumption Survey 2022

Wales

About the News Consumption report 2022

The aim of the News Consumption report is to inform understanding of news consumption across the UK and within each UK nation. This includes sources and platforms used, the perceived importance of different outlets for news, attitudes towards individual news sources and local news use.

The primary source* is Ofcom's News Consumption Survey. In News Reports published from 2018 to 2020, the adult (16+) research was conducted using a mixed methodology, combining online and face to face interviews (F2F). However, during the last two years of research, Jigsaw Research were unable to do this consistently, due to the Covid-19 pandemic.

Since online methodologies tend to underrepresent low/non internet users, Jigsaw Research conducted a combination of online and telephone interviews during November/December 2020, March/April 2021 and November/December 2021, to ensure that these groups had the opportunity to express their views. In March/April 2022, Jigsaw Research reverted back to the preferred methodology of conducting online and face to face interviews, to be consistent with previous and future years.

This News Report shows combined online and face to face adult data for 2022 (March/April 2022 only) and also makes a comparison to the combined online and face to face adult data from 2020. 2022 data cannot be compared with 2021 data due to methodology differences highlighted above.

The full UK report and details of its methodology can be read [here](#).

**The News Consumption 2022 report also contains information from BARB for television viewing.*

Key findings from the 2022 report

- TV remains the most-used platform for news nowadays by adults in Wales (77%), followed by social media 51% and radio at 43%.
